EMERGENCY EXIT PLAN

FIRE SAFETY & EVACUATION
REVIEW ANNUALLY · 2026

IN THE EVENT OF A FIRE

Fire action

- 01 On discovering a fire, raise the alarm and alert everyone on the premises. Tackle it with the CO₂ extinguishers only if safe to do so, and isolate the mains at the breaker or switch if possible.
- 02 If the fire cannot be tackled safely, vacate the premises immediately and contact the fire service as soon as possible. Fire exits are located on all sides of the building.
- 03 Go to the assembly point — outside, towards the main site exit. Meet there as soon as possible and check that all staff are accounted for.
- 04 If anyone has inhaled smoke or fumes, make sure the ambulance service has been contacted for their assistance.
- 05 Wait for the emergency services at the assembly point and brief them on the incident and premises. A premises information document is also held at the front of the building.
- 06 All staff are responsible for applying their training in response to a fire, as outlined above.

 **Fire exit route**
Exits on all sides

 **CO₂ extinguisher**
Use if safe to do so

 **Assembly point**
Outside · main site exit

 **Stairs**
To upper floors
